

OC Series Outdoor Electrical Cabinet

Follow ANSI/EIA RS-310-C Standard. Able to keep communication equipments far from exploding under sun, heat radiation, rain, air...etc. and provide water, humidity, dust, chemical resistance. This series ensures equipments work appropriately and offers the largest capacity for our customers.

Structure

Modular design, and extractions can be designed for different requests (environment, function, cost...etc.) It can be adjusted easily during maintain process. No bolts appearance design keeps meaning intrude away.

Welded design, that double shell design is proposed for cutting off heat radiation. Full range Water-Proof & Anti-Heat options are able to choose.

Appearance

RoHS certificated outdoor powder coating provides oxygen, scratch, rust & corrode resistance and makes the enclosure a longer life. (Standard Color: White, it's available in different colors)

Heat Resource Cutting off & Ventilation

Double sheets design gives at least 10 degrees lower then outer temperature at one point. After 3 fans work(20W/per), extra 6 degrees lower is possible.

High degree of protection is IP56.
